

### CAUTION - ELECTRICALLY OPERATED PRODUCT:

Not recommended for children under eight years of age without adult supervision. As with all electric products, precautions should be observed during handling and use to reduce the risk of electric shock.

**WARNING:** When using electrical products, basic safety precautions should be followed including the following:

- Read this manual thoroughly before using this device.
- MTH recommends parents examine the operating American flag periodically for conditions that may result in the risk of fire, electric shock, or injury to persons, such as damage to wires, clips or other parts, and that, in an event such conditions exist, the operating American flag should not be used until properly repaired.
- This operating American flag is intended to be used indoors. Do not use if water is present. Serious or fatal injury may result.
- Do not operate the operating American flag with damaged wires or clips.
- If damaged call MTH service for instructions.
- Do not use this operating American flag for other than its intended purpose. This unit was designed to operate with any AC or DC output toy train transformer. See the individual transformer's operating manual for more operating and safety information.

### LIMITED ONE YEAR WARRANTY

This item is warranted for one year from the date of purchase against defects in material or workmanship. We will repair or replace (at our option) the defective part without charge for parts or labor, if the item is returned to the address below within one year of the original date of purchase. This warranty does not cover items that have been abused or damaged by careless handling. Transportation costs incurred by the customer are not covered under this warranty.

This warranty gives you specific legal rights and you may have other rights which vary from state to state.

The operating American flag adds a splash of life to your layout. Constructed from sturdy ABS plastic and brightly painted, the flag makes a perfect addition to any O-27 or O Gauge layout.

The waving American flag is pre assembled, so set up is quick and easy by following the setup diagram on the inside.

WAVING  
AMERICAN FLAG

## Wiring Instructions

Before the flag is placed on the layout, the flag must be wired together with the activation button, and an AC Transformer with a minimum output of 9V AC.

In order to connect power to each component, the (3) enclosed wires must be connected to the wiring posts located on the underside of the flag and the activation button. Follow the diagram to locate the correct wire post terminals for the included wires and activation button. Once the wires are in place, set the transformer voltage between 9 and 15 volts and turn on the switch to activate the flag. Optimal operation of the flag occurs between 9 and 15 volts.
